

ABOUT THE GAME

Smokey's back, and this time, he's playing for keeps!

He's devoured croissants atop the Eiffel Tower, dusted off the ruins of ancient Pharaohs, and walked the halls of Valhalla. Now, his next heist takes him to Spin City, where he's donning the ultimate disguise—the King himself.

Join Le King and his suspicious mind as he struts down the Strip, hitting jackpots and outplaying the house at every turn. In this 6-reel, 5-row Super Cascade game with Cluster wins, a massive 20 000 times your bet max win is up for grabs in every game mode. Stack the deck, steal the gold, and live like a King! In Spin City, the house always wins—unless the Bandit is in town.

FEATURES

SUPER CASCADES

When a winning combination occurs, all regular paying symbols of the type that were part of the winning combination are removed from the grid, and new ones drop down to fill the empty spaces.

GOLDEN SQUARES

When a winning combination occurs, the squares behind the winning symbols will be highlighted as Golden Squares.

If there is a Neon Rainbow symbol on the grid, it will activate any Golden Squares after all wins have been collected. Activated Golden Squares reveal either Bronze, Silver, or Gold Coins and can also reveal Treasure Pots, Green or Gold Clover symbols, and Jackpot Markers.

All Coins are cash prizes that are paid as a multiple of your bet.

Bronze Coins can have the following values: 0.2x, 0.5x, 1x, 2x, 3x, 4x

Silver Coins can have the following values: 5x, 10x, 15x, 20x

Gold Coins can have the following values: 25x, 50x, 100x, 250x, 500x

After all Golden Squares have been revealed, the Clover symbols will activate. Green Clover symbols will multiply all Coins or existing Treasure Pots on adjacent squares with one of the following Multipliers: x2, x3, x4, x5, x10, x20. Gold Clover symbols will multiply all Coins or existing Treasure Pots on the grid with one of the following Multipliers: x2, x3, x4, x5, x10, x20.

Once all Clover symbols have applied their multipliers, Treasure Pot symbols will activate. Treasure Pots collect the values of all Coins and other Treasure Pots and store their total value. Treasure Pots activate top-to-bottom, left-to-right. Treasure Pots will not collect Jackpot Markers.

When the last Treasure Pot on the current grid has activated, all other Golden Squares will activate again to reveal new symbols and the process above repeats.

Once all reveals and activations have been completed, all Coins and Treasure Pots will be added together and multiplied by your bet amount to determine the final awarded win.

JACKPOT MARKERS

Jackpot Markers can land on the grid or be revealed in the Golden Squares. Jackpot Markers award four different jackpot prizes with a value based on your current bet. The four Jackpot Markers are:

MINI: 10x

MAJOR: 100x

MEGA: 1 000x

MAX WIN: 20 000x

The current value of each jackpot is displayed outside the grid on the Jackpot Sign.

Jackpot Markers that land during a spin will be activated if they land together with a Neon Rainbow. When a Jackpot Marker is revealed in a Golden Square it will be awarded once all Coins and Treasure Pot values have been awarded. Only 1 of each Jackpot value can appear at the same time, so a maximum of 4 Jackpot Markers can land on a spin. The Jackpot Marker values will be combined before being awarded.

Once all the wins and cash prizes have been awarded, all Special Symbols and Golden Squares are removed from the grid for the next spin.
