

GAME INFO - JOKER BOMBS

FEATURES

Joker Bombs is a colour explosion game set in a funfair theme! It has a 6x5 grid with all-scatter wins. This game is filled with normal, revealing and epic multiplier bombs to really take your wins to another level! You can win up to 5,000 times your bet!

MULTIPLIER BOMBS

During each round all wins will be collected and displayed above the reels as a pending win amount. That amount will be updated after every spin/cascade that awards a new win. If you land one or more multiplier bombs their values will be added together and stored as a pending win multiplier that is applied to the total win at the end of each round. All multiplier bombs act as scatter symbols.

There are three types of multiplier bombs:

NORMAL BOMB

Will land with the multiplier value visible, explodes and adds the multiplier value to the pending win multiplier. Possible values: 2x, 3x and 4x

REVEALING BOMB

Will land with a ?-character, explodes and adds the multiplier value to the pending win multiplier. Possible values are: 5x, 10x, 25x and 50x

EPIC BOMB

Will land with an X-character, explodes and multiplies the pending win multiplier with the value shown. Possible values are: x2, x3, x4, x5 and x10

The normal and revealing bombs will only explode and add their multiplier values to the win multiplier if a win has occurred on the current spin and there is a pending win above the reels.

The epic bombs will only explode to multiply an existing pending win multiplier.
