

GAME INFO - LINES

ABOUT THE GAME

LINES is a new take on a classic game of chance where the objective is to reach a set target on one or more Lines. If you match or beat the target on every Line, you win!

The maximum win in this game is 5000 times your bet.

FEATURES

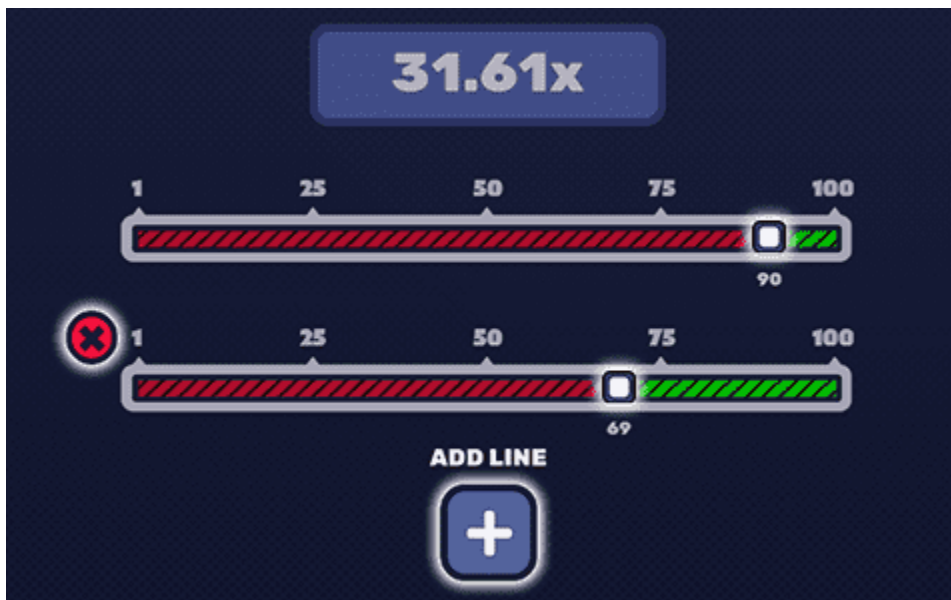

THE LINE

In LINES, you can choose to play with one, two or three Lines. Each Line goes from 1 to 100.

The game starts with one Line. You can add additional Lines by pressing the blue + button under the current Line. You can remove a Line by pressing the red X button in the upper left corner of the Line.

On each Line there is a slide handle that can be adjusted either left or right to set your desired Target. The Target can be set to any whole number from 2 to 98.

WINNING

Setting the Target on a Line adjusts how much that Line will contribute to your total payout. The higher the Target, the greater the payout for that Line, but a higher Target also reduces the chance of reaching it.

The total payout for the game is shown above the Lines. Your final win amount will be determined by the total payout times your bet amount.

Once you have set your desired Target on each Line, press BET to place your bet and start the round. When doing so, each Line will be filled to a randomly determined value. If the value on a Line is equal to or higher than the Target for that Line, you win on that Line.

You must win on every Line in play to win that round and be awarded the payout.

RETURN TO PLAYER

The RTP of this game is 98%. The RTP is deterministically calculated by a theoretical probability model. The RTP was verified by running 10,000,000,000 simulations.

The max win for this game is 5000 times your bet.

If the total payout for a certain combination of Targets across all Lines would exceed 5000 then a bet cannot be placed and one or more Targets need to be reduced.

5025.64x

If the total payout for a certain combination of Targets across all Lines would be lower than 1.05 then a bet cannot be placed and one or more Targets need to be increased.

WAYS TO WIN

Configure the Target for each Line in play with the slider. Place a bet to start the round. If the random value on each Line reaches or exceeds the Target you win the total payout. If at least one Line does not, you do not win.
