

GAME INFO - BACCARAT

ABOUT THE GAME

BACCARAT is a game where the aim is to correctly predict the outcome of the card game. Who will win - the Player, the Banker, or will there be a Tie? First, place your bets on each outcome. Once you press BET, the game will start and the outcome will be revealed. The max win in this game is 9 times your bet and is achieved by correctly predicting a Tie.

FEATURES

Once you press BET, the game will start. The game has two participants - the Player and the Banker. At the start of the game, the casino deals cards to both participant's hands. All cards are dealt from a Deck consisting of 8 standard card decks (excluding jokers, i.e. 52x8 cards) shuffled together. Each hand is initially dealt 2 cards, and are dealt in alternating order starting with the Player. Each card is dealt face down, and is revealed as soon as it's dealt. Depending on the value of each hand, a third card may be drawn for either Player, Banker, or both hands.

In order to determine whether a third card should be drawn for a hand, the following rules apply, also referred to as the "tableau":

- Each participant can either draw, or stand (no card is drawn).
- If either hand is a "natural" 8 or 9 - meaning that it has a total value of either 8 or 9 - neither hand draws a third card

Player

- If the Player hand is worth 6 or 7, they stand
- If the Player hand is worth 5 or less, they draw a third card

Banker

- If the Player stood (hand value 6 or 7), the Banker follows the same two rules above:
 - If the Banker hand is worth 6 or 7, they stand
 - If the Banker hand is worth 5 or less, they draw a third card
- If the Player hand was awarded a third card, the following rules apply to the Banker:
 - If the Banker hand is worth 2 or less, they draw a third card regardless of what the player's third card is.
 - If the Banker hand is worth 3, they draw a third card unless the player's third card is an 8.
 - If the Banker hand is worth 4, they draw a third card if the player's third card is 2, 3, 4, 5, 6, or 7.
 - If the Banker hand is worth 5, they draw a third card if the player's third card is 4, 5, 6, or 7.
 - If the Banker hand is worth 6, they draw a third card if the player's third card is a 6 or 7.
 - If the Banker hand is worth 7, they stand

After the tableau has been consulted, and cards have either been drawn or not, the winning hand is determined by calculating the value of the hand per the card point value rules below.

Card point values and hand values

Hand values are calculated by adding the face value of all cards in the hand and dividing the sum by ten, then saving the remainder. The face value of each card is as follows:

Ace: has a face value of 1

2 - 9: have a face value equal to the value of the card

10 - K: all have a face value of 10
