

GAME INFO - BOXES

BOXES is an exciting game where the objective is to find Diamonds by picking Boxes on different Rows. When you find a Diamond on a Row, you can advance to the next Row and increase your win! If you pick a Box containing a Mine, you will lose and have to restart the game.

Before placing the bet, you can configure the game by choosing how many Rows you want and the Difficulty setting. A higher Difficulty means each Row will contain more Mines, but increases your potential winnings!

Once you have placed your initial bet, each pick is free. Pick Boxes until you have reached the final Row, or are happy with the collectable win and wish to collect it.

PAYOUT DISPLAY

Above the playing field is a row of bars with numbers. The highlighted bar shows the payout you will receive if you collect immediately, expressed as a multiplier of your initial bet. The second bar, to the right of the highlighted value, is the potential payout if you successfully find another Diamond and advance to the next Row, and so on. The Mine icon next to the second bar shows the number of Mines in the next Row. Your collectable win amount is also displayed in your currency in the dark bar below the game.

SETTINGS MENU

The number of Rows and the Difficulty is configurable in the settings screen. The more Rows you choose, the higher the potential payout of the game. Adjusting the Difficulty setting will increase or reduce the number of Mines per Row and the challenge of the game, and affects the potential win. You can configure the game to fit your own playstyle!
