

GAME INFO - VENDING MACHINE

ABOUT THE GAME

Vibe check! Feeling good? Great! Then kick back and relax with us for a while. Vending Machine is a 5-reel, 5-row slot with paylines and a max win of 5,000 times your bet. The max win can be reached in the Lo-Fi Spins and Spin and Chill game modes.

MULTIPLIER LIGHTS

Activate rows of multiplier lights for massive wins!

Each row has an inactive multiplier displayed to the left. At the start of every spin the multiplier gets a random value from one of the following possible values: 2x, 3x, 4x, 5x, 6x, 7x, 8x, 9x, 10x.

When a winning combination occurs, the multiplier on each row that has symbols included in the winning combination is increased by the number of winning symbols on that row. Each winning symbol increases the multiplier by 1.

When the Multiplier Boost scatter symbol lands it multiplies the multiplier value on the row where it landed by 2. The Epic Multiplier Boost scatter symbol multiplies all row multiplier values by 2.

When the Lightning Bolt scatter symbol lands on a row it activates the multiplier for that row.

When at least one symbol on an activated row is part of a winning combination, that row multiplier is applied to the win. If a winning combination includes symbols from more than one activated row, the values of the multipliers are added together before being applied to the win.

A row's multiplier value cannot be applied more than once per winning combination, regardless of how many winning symbols are on that row.

When the Blackout Skull scatter symbol lands on a row it deactivates the multiplier for that row.

LO-FI SPINS

Land 3 FS scatter symbols at the same time in the base game to activate this bonus feature.

This feature begins with 3 activated rows of multiplier lights. The feature ends once all row multipliers are deactivated.

SPIN AND CHILL

Land 4 FS scatter symbols at the same time in the base game to activate this bonus feature.

This feature begins with 5 activated rows of multiplier lights. The feature ends once all row multipliers are deactivated.

REMOVE & CASCADE

Whenever the grid has settled and no more winning combinations can occur on the current spin, there is a chance to trigger an extra cascade where all low-paying symbols are removed and new symbols drop down to replace them.
